

# Baby Scale Operator's Manual

## Specifications

Capacity: 44 lbs / 0.001 lb or 20 kgs / 5g

Minimum Weight: 0.2 lbs

Weighing Units: lb / kg

Power: AAx4

Auto-shut-off: 1 minute

Music: 35 songs

Measuring Tape Max Length: 5 ft (1.5 m)

## Operation

- Place a soft blanket on the scale and press ON/OFF/TARE key to turn on the scale. When the scale shows 0, place your baby on the blanket gently. Then check the readout of the scale.
- The music will play automatically at the same time.
- If needed, press UNIT key to switch between lb and kg.
- To measure the baby's height, open the tape cover on the left side under the scale platform and pull out the tape. Press the release button under the tape holder to retract the tape.
- The scale can memorize 9 records of the history weighing. To check the history, press SET. Keep pressing SET can switch between different records. P0 is the most current record.
- The scale has a built-in thermometer and the temperature will be displayed on the LCD. To switch between F and C, press UNIT key during scale warming up (the period before the scale shows 0 after turned on).

## Warranty

Your scale comes with one year limited warranty. It covers parts only (labor and shipping are not covered). We strongly recommend you register your scale right after you purchase the scale. To register please go to [www.digiweigh.us/service](http://www.digiweigh.us/service)
